TARGET

My goal is to move to Barcelona and enjoy new and exciting challenges by joining a dynamic and open-minded company. I would like to grow as a software developer by learning new innovative technologies in different fields, combining two qualities that belong to me: creativity and imagination.

WORKS EXPERIENCES

Enerj

SANT'AMBROGIO DI VALPOLICELLA (VR)

Full stack developer

Sep 2021 - Present

- Preprocessor development in C# and .NET
- I worked on web applications for electronic invoice management using the Razor Pages system for generating dynamic web pages, together with HTML, CSS, Javascript, JQuery technologies on the front-end side, and C# on the back-end side.
- I reviewed graphics and layouts on web applications as a front-end developer and created client application interfaces from scratch with WPF and C#, studying the layout and user experience.
- Theoretical knowledge of the Agid system with participation in an advanced course.

Kosme

ROVERBELLA (MN)

Technical support and training

Jul 2016 - Sep 2021

- Technical support for mechanical, electrical and software problems of labelling machines. Remote and on-site support.
- Technical training of internal and external workers (customers and technicians) in Italian and English language.
- Drafting, translating (English) and creating technical manuals.

EDUCATION AND CERTIFICATIONS

React academy (Teacher: Fabio Biondi & Michele Stieven)

Oct 2022 / 4 weeks

TalentFactory [Certificate react academy](#)

The following topics were covered in this course: React fundamentals, Real World Projects with declarative data fetching, react query, multi-view applications via router, application security, React deep dive with project organisation, advanced components, introduction to testing and State management.

Junior front-end developer

15/05/2021 - 26/04/2022

Start2impact [Certificate front-end](#)

During this course I acquired a solid base of skills in front-end development, especially in technologies like HTML, CSS, JavaScript and React. This allowed me to create interactive, immersive and responsive user interfaces to improve the user experience. The knowledge acquired during the course was tested through practical tasks and evaluated by experienced tutors in the field.

English certificate of attendance level FL7 = B1

30/06/2021 - 07/12/2021

Fluentify [Certificate English B1](#)

Computer science / diploma

2009- 2016

Institute ISSS Carlo Anti

LANGUAGES

ITALIAN : native

ENGLISH : intermediate knowledge

SPANISH : beginner (currently studying)

HOBBIES AND INTERESTS

I have a strong passion for front-end, graphics and animation. In my spare time, I focus my skills on technologies such as HTML, CSS, JavaScript, Typescript, React and Next.js, studying at home and developing personal projects with the purpose of growing and learning new skills every day.

I love reading fantasy books and writing short stories and novels to stimulate my creativity. Since 2020, I have been writing a fantasy book that I hope to publish one day. I also wrote some short stories and participate in contests.

I am a runner who likes to run everywhere.
