TARGET

My goal is to enjoy new and exciting challenges by joining a dynamic and open-minded company, becoming a front-end developer whose purpose is to create immersive and innovative interfaces that combine aesthetics and functionality, all by combining two qualities that are my own: creativity and imagination.

WORKS EXPERIENCES

Enerj
Full-stack developer

SANT'AMBROGIO DI VALPOLICELLA (VR)
Sep 2021 – Present

- Preprocessor development in C# and .NET with git as control version system and Azure for project overview and cloud repo.
- I worked on web applications for electronic invoice management using the Razor Pages system for generating dynamic web pages, together with HTML, CSS, Javascript, JQuery technologies on the front-end side, and C# on the back-end side.
- I reviewed graphics and layout on web applications created in React with Typescript as a front-end developer, improving the user experience and learning the component-based architecture.
- Created client application interfaces from scratch with WPF and C#, studying the UX / UI.
- Functional-level bug fixes.

Kosme
Technical support and training

ROVERBELLA (MN)
Jul 2016 – Sep 2021

- Technical support for mechanical, electrical and software problems of labelling machines. Remote and on-site support.
- Technical training of internal and externals workers (customers and technicians) in italian and english language.
- Drafting, creating and translating (english) technical manuals.

EDUCATION AND CERTIFICATIONS

React academy (Teacher: Fabio Biondi & Michele Stieven)

Oct 2022 / 4 weeks

TalentFactory   Certificate react academy

The following topics were covered in this course: react fundamentals with practical experience building web applications, creating custom components, using React router library for routing between pages, structure and organization of projects and state management with useState, useReducer, useContext and Redux Toolkit

Junior front-end developer

15/05/2021 – 26/04/2022

Start2impact   Certificate front-end

During this course I acquired a solid base of skills in front-end development, especially in technologies like HTML, CSS, JavaScript and React. This allowed me to create interactive, immersive and responsive user interfaces to improve the user experience. The knowledge acquired during the course was tested through practical tasks and evaluated by experienced tutors in the field.

English certificate of attendance level FL7 = B1

30/06/2021 – 07/12/2021

Fluentify   Certificate english B1

Computer science / diploma

2009- 2016

Institute ISISS Carlo Anti

LANGUAGES

ITALIAN : native
ENGLISH : intermediate knowledge
SPANISH : beginner (currently studying)

HOBBIES AND INTERESTS

I have a strong passion for front-end, graphics and animation. In my spare time, I focus my skills on technologies such as HTML, CSS, JavaScript, Typescript, React and Next.js, studying at home and developing personal projects with the purpose of growing and learning new skills every day.
I love reading fantasy books and writing short stories and novels to stimulate my creativity. Since 2020, I have been writing a fantasy book that I hope to publish one day. I also wrote some short stories and partecipate a contests.
I am a runner who likes to run everywhere.
